PROJECTS

Medlinc | *HTML/CSS, Bootstrap, JavaScript, Python, Django, Git, VS Code*

 [Github](#)

- * Developed a web-based healthcare application that offers comprehensive medical services on a unified platform.
- * This healthcare application offers 3 distinct services, namely medical consultation, laboratory testing, and the delivery of medical products. Additionally, it provides other essential services, such as 24/7 availability of emergency assistance (SOS).
- * 4 essential forms have been developed for users to access fast services, namely the Appointment, Emergency, Organ Donation, and Enquiry forms.
- * The implementation of user authentication through login and sign-up functionality, as well as the creation of an admin page for administrative purposes, has been executed.

E-commerce | *Next JS, Tailwind CSS, Sanity, Stripe, Git, VS Code*

 [Github](#)

- * An ecommerce web application has been developed for the purpose of facilitating the purchase of smart accessories.
- * The feature of being able to add an unlimited number of items to the cart is a functional aspect of the system.
- * In order to gain administrative access to all products and other essential components, we utilize the Sanity platform.
- * The payment system has been integrated with Stripe.

SiteScript | *React JS, Tailwind CSS, Firebase, Git, VS Code*

 [Visit](#)

- * This is a web application platform that offers a comprehensive and seamless digital solution. Our services include web, app, data analysis, block-chain, IT support, Design solutions, and many other features that are designed to enhance the user experience.

EXPERIENCE

Model Verse | *Freelance* — [Visit](#)

Present

Develop a web-based application that enables users to generate fashion clothing models in a matter of minutes, thereby augmenting their experience with artificial intelligence models.

Up-Bringing | *Freelance* — [Visit](#)

May 2023 - June 2023

A web-based application has been created to promote proper nutrition for children of different age groups, targeting both parents and children. The application employs ReactJS and Firebase database and authentication, and has attracted more than 100 users.

Ubilang | *Freelance* — [Visit](#)

July 2023

Develop a website for the purpose of automating content dubbing through the generation of videos and creation of audios in a prompt manner.
